

## **AMI Corner December 2015**

As of mid-November, a total of 18,000 advanced meters have been installed in Choptank Electric's service territory. This represents approximately 30% of our distribution service system.

Due to the more rural service territory in our Chestertown District, our deployment schedule was extended by several weeks. As a result, we have made a few adjustments to the advanced meter deployment schedule going forward.

Scope Services representatives are expected to begin the advanced meter deployment in the Denton District the first full week in December. AMI announcement cards were mailed Thursday, November 19 to approximately 11,000 members in the Denton District. As in the previous districts where the meters have been installed, members in the Denton District will also receive an automated phone call several days in advance of the meter installation in their area.

Choptank Electric continues to keep our members informed and up-to-date with the latest developments of the advanced meter installation project. Here are some of the ways we are informing our members: AMI Open House events, announcement card mailings, automated phone calls, service representatives knocking on our members' door, door hangers after meter installation, a dedicated AMI page on our website, a dedicated AMI Corner feature section in our monthly newsletter, and e-mail notifications.

Have you updated your contact information with us? Without a current phone number or email address, we can't keep in touch with you, and you may not receive some of the notifications outlined above. Please call our Members Service Center at 1.877.892.0001 to update your contact information so we may better communicate this important information with you.
