

AMI Corner June 2015

Choptank Electric will begin the deployment of advanced meters by mid-June starting in our St. Michaels district. Members in this area should expect to receive announcement postcards in the mail approximately several weeks before we start changing out the meters. These cards will explain what members can expect when a Scope Services representative, our authorized contractor performing meter exchanges, or a Choptank Electric representative visits their home or business.

In addition to the postcard reminder, members will receive an automated phone message several days before the deployment begins. This will be the procedure for all areas of our service territory as we roll out the advanced meters to our members. The full deployment process is expected to take approximately 12 – 14 months.

Have you visited our website lately? For all information regarding our AMI meter deployment, various fact sheets, and videos, go to www.choptankelectric.coop and click on the Advanced Metering Information button. We've recently added a few more information sheets:

*Advanced Meter
Information*

The Choptank Electric Deployment Fact Sheet provides information regarding our meter deployment process, benefits of the advanced meter to our members and the Co-op, and Opt Out procedures. Additionally, we have added the Opt Out Form and Maryland Public Service Commission approved rider. We encourage our members to take a look at these useful and educational pieces. If you do not have internet access, please contact our Member Service Center at 1.877.892.0001 and we will be happy to mail you the information.
